CICLO DI SEMINARI

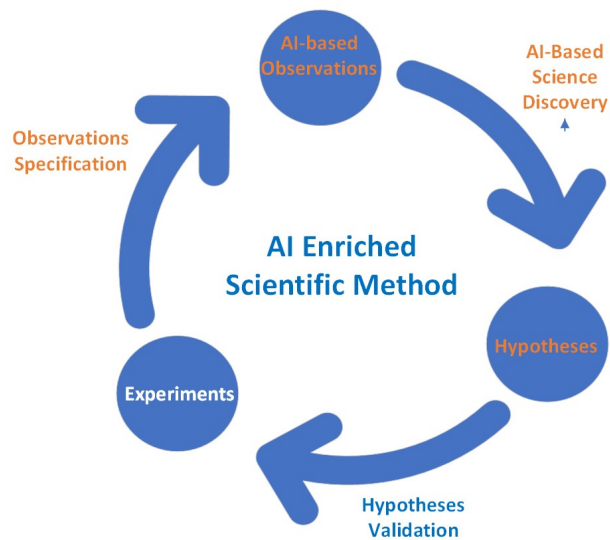

16/05/2024

Science Discovery and Compute Continuum

Simone Marini

Institute of Marine Sciences

CNR-ISMAR

Recent advances in Artificial Intelligence support research activities not only by providing new advanced data analysis tools, but also by supporting the generation of scientific hypotheses and the design of new experiments (Science Discovery). The seminar will introduce the general concepts related to Science Discovery and discuss how it fits into the data acquisition and processing pipeline from the edge to the cloud (Compute Continuum).
